

Swiggy Onboarding Audit

Bhumika Gujar · Aspiring Product Manager

Core Insight:

Swiggy's onboarding flow is visually polished but delays value delivery until Step 6. Users are asked for login, OTP, and location permissions before seeing restaurants, increasing activation friction and early abandonment risk.

Top Friction Points

Friction	Why It Matters	Business Risk
Login Before Value	Users must share phone number before seeing restaurants.	High onboarding abandonment.

Permission Fatigue	Generic location popup appears before trust formation.	Lower location opt-in rate.
Checkout Complexity	Too many fields during highest-intent moment.	Cart abandonment increase.

Improved PM Recommendations

1. Browse Before Login P0

Allow users to browse restaurants before OTP verification. Move authentication closer to checkout intent.

Expected Impact: Faster aha moment, reduced onboarding friction, improved activation rate.

2. Value-Framed Permission Prompt P0

Add a branded pre-permission screen explaining why location improves delivery speed and restaurant relevance.

Expected Impact: Higher location permission acceptance rate.

3. Simplified First Checkout P1

Enable auto-filled addresses and default Cash on Delivery for first-time users.

Expected Impact: Reduced first-order checkout abandonment.

A/B Testing Plan

Component	Details
Experiment	Deferred Login Flow
Hypothesis	Browsing before authentication increases activation.
Primary Metric	Activation Rate
Secondary Metrics	Restaurant Feed Reach, Add-to-Cart Rate
Guardrail Metrics	Bounce Rate, Fraud Rate
Runtime	2 Weeks

Product Management Takeaway

The highest-performing onboarding systems reduce effort until users experience clear product value. Swiggy currently prioritizes data collection before value realization, creating unnecessary activation friction in the earliest stages of the funnel.

This audit demonstrates:

- Activation funnel analysis
- User psychology reasoning
- Product prioritization
- Experiment design thinking
- Business impact framing
- Structured PM communication
